NOTES TO THE REPORT FOR THE FINANCIAL QUARTER AND YEAR ENDED 31 DECEMBER 2019

PART A: EXPLANATORY NOTES PURSUANT TO MALAYSIAN FINANCIAL REPORTING STANDARD ("MFRS") 134: INTERIM FINANCIAL REPORTING

A1. BASIS OF PREPARATION

These condensed consolidated interim financial statements ("Interim Reports") are unaudited and have been prepared in accordance with the MFRS 134 'Interim Financial Reporting' issued by the Malaysian Accounting Standards Board ("MASB"), the International Accounting Standard ("IAS") 34 'Interim Financial Reporting' and the requirements of Companies Act 2016. These Interim Reports have been prepared under the historical cost convention, as modified by the revaluation of investment properties, financial assets at fair value through profit or loss and financial assets at fair value through other comprehensive income.

These Interim Reports have also been prepared in accordance with paragraph 9.22 of the Main Market Listing Requirements ("MMLR") of Bursa Malaysia Securities Berhad ("Bursa Securities").

These unaudited Interim Reports should be read in conjunction with the Group's audited financial statements for the financial year ended 31 December 2018. The explanatory notes attached to these Interim Reports provide an explanation of events and transactions that are significant to the understanding of the changes in the financial position and performance of the Group since the financial year ended 31 December 2018.

A2. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies and presentation adopted by the Group in these Interim Reports are consistent with those adopted in the Group's audited financial statements for the financial year ended 31 December 2018, except for the adoption of the following standards, amendments to standards and interpretations that became effective from financial year beginning on or after 1 January 2019:

- MFRS 16 'Leases'
- Amendments to MFRS 9 'Financial Instruments' Prepayment features with negative compensation
- Amendments to MFRS 128 'Investments in Associates and Join Ventures' Long-term Interests in Associates and Joint Ventures
- IC Interpretation 23 'Uncertainty over Income Tax Treatments'
- Annual Improvements to MFRSs 2015 2017 Cycle
 - Amendments to MFRS 3 'Business Combinations'
 - Amendments to MFRS 11 'Joint Arrangement'
 - Amendments to MFRS 112 'Income Taxes'
 - Amendments to MFRS 123 'Borrowing Costs'

The adoption of the above do not have any significant financial impact to the current and prior financial period's consolidated financial statements of the Group upon their initial application, except as mentioned below:

MFRS 16 'Leases'

MFRS 16 'Leases' supersedes MFRS 117 'Leases', IC Interpretation 4, Determining whether an Arrangement contains a Lease, IC Interpretation 115, Operating Leases – Incentives and IC Interpretation 127, Evaluating the Substance of Transactions Involving the Legal Form of a Lease.

NOTES TO THE REPORT FOR THE FINANCIAL QUARTER AND YEAR ENDED 31 DECEMBER 2019

A2. SIGNIFICANT ACCOUNTING POLICIES (continued)

MFRS 16 'Leases' (continued)

Under MFRS 16, a lease is a contract (or part of a contract) that conveys the right to control the use of an identified asset for a period of time in exchange for consideration. MFRS 16 introduces a single accounting model for a lessee and eliminates the classification of leases by the lessee as either finance leases (on balance sheet) or operating leases (off balance sheet).

MFRS 16 requires a lessee to recognise a "right-of-use" of the underlying asset and a lease liability reflecting future lease payments for leases. The right-of-use asset is depreciated in accordance with the principle in MFRS 116 'Property, Plant and Equipment' and the lease liability is accreted over time with interest expense recognised in profit or loss.

For lessors, MFRS 16 retains most of the requirements in MFRS 117. Lessors continue to classify all leases as either operating leases or finance leases and account for them differently.

The Group has adopted MFRS 16 using the modified retrospective approach which measured the right-ofuse assets equals to the lease liabilities at 1 January 2019 with no restatement of comparative information. The Group has recognised right-of use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases and leases of low-value assets.

On transition to MFRS 16, the Group has recognised an amount of RM4.2 million of right-of-use assets and RM3.8 million of lease liabilities. When measuring the lease liabilities, the Group has discounted the operating lease commitments using the incremental borrowing rates at 1 January 2019.

The following standards, amendments to published standards and interpretations to existing standards that have been issued by MASB but are not yet effective:

Effective for annual periods commencing on or after 1 January 2020

- The Conceptual Framework for Financial Reporting
- Amendments to MFRS 3 'Business Combinations' Definition of a Business
- Amendments to MFRS 9 'Financial Instruments', MFRS 139 'Financial Instruments : Recognition and Measurement' and MFRS 7 'Financial Instruments : Disclosures' – Interest Rate Benchmark Reform
- Amendments to MFRS 101 'Presentation of Financial Statements' and MFRS 108 'Accounting Policies, Changes in Accounting Estimates and Errors' – Definition of Material

Effective for annual periods commencing on or after 1 January 2021

MFRS 17 'Insurance Contracts'

The International Accounting Standards Board has tentatively proposed to amend the effective date of IFRS 17 'Insurance Contracts' to 1 January 2022.

The Group will assess the application of adopting the above standards, amendments to published standards and interpretations to exiting standards before the effective dates.

In 4Q-2019 under review, the Group recorded a higher total operating revenue of RM54.1 million (4Q-2018: RM44.0 million), mainly contributed by the higher gross earned premiums of RM44.0 million (4Q-2018: RM39.0 million) recorded by the General Insurance business held via subsidiary, MAA General Assurance Philippines, Inc. In 4Q-2019 under review, the Investment Holdings segment recorded a lower LBT of RM16.0 million (4Q-2018: RM20.8 million). | Range of currency exchange rate | 1 RM = 12.17 to 12.30 PHP | | 1 RM= 12.65 to 12.94 PH | |

Total GPW grew by 14.8% to PHP512.6 million (4Q-2018: PHP446.7 million) in 4Q-2019, driven mainly by increase in the production of both motor and non-motor classes of business. Motor classes recorded an increase in GPW of 8.1% to PHP193.2 million (4Q-2018: PHP178.7 million), whilst non-motor classes also registered a 19.2% increase in GPW to PHP319.4 million (4Q-2018: PHP268.0 million). The motor and non-motor businesses contributed 38% (4Q-2018: 40%) and 62% (4Q-2018: 60%) respectively of the total GPW in 4Q-2019.

Nevertheless despite of the GPW growth, MAAGAP has recorded a LBT of PHP96.2 million in 4Q-2019 compared to a PBT of PHP109.0 million in 4Q-2018. During the current quarter under review, the loss suffered by MAAGAP was attributed mainly to the underwriting deficit of PHP34.4 million affected by higher claim ratio of 71.9%, compared to the underwriting surplus of PHP124.6 million with claim ratio of 28.3% in 4Q-2018. Both motor and non-motor businesses recorded higher claim ratio at 64.4% (4Q-2018: 28.5%) and 82.5% (4Q-2018: 27.7%) respectively in 4Q-2019. The cause for the escalating claim ratio experienced in 4Q-2019 was mainly due to the abundant natural disasters namely typhoons and earthquakes that hit Philippines during the period.

In 4Q-2019, MAAGAP also recorded net fair value losses on investments classified at FVTPL of PHP34.3 million (4Q-2018: gains of PHP17.2 million) and higher management expenses of PHP59.1 million (4Q-2018: PHP57.4 million), offset by higher investment income of PHP32.7 million (4Q-2018: PHP24.3 million) and realised gains from disposal of investments of PHP0.8 million (4Q-2018: losses of PHP1.3 million).

In FYE 31.12.2019 under review, the Investment Holdings segment recorded a lower LBT of RM22.4 million (FYE 31.12.2018: RM42.2 million). The lower LBT was attributed to improved investment return with net fair value gains of RM4.6 million from investments classified at FVTPL compared to FYE 31.12.2018 where it recorded net fair value losses of RM24.5 million, coupled with 4.3% reduction in management expenses and lower fair value losses of RM0.7 million (FYE 31.12.2018: losses of RM2.8 million) on investment properties. The lower assets position was mainly attributed to utilization of certain funds for acquisition of SIB and HCAT and provision of working capital to subsidiary to commence new factoring business. Total liabilities of the Investment Holdings segment stood at RM9.9 million as at 31 December 2019 (2018: RM8.9 million).

Total GPW grew by 12.4% from PHP1,951.3 million in FPE 31.12.2018 to PHP2,193.3 million in FYE 31.12.2019, driven mainly by increase in the production of both motor and non-motor classes of business. Motor classes recorded an increase in GPW of 4.3% to PHP789.2 million (FYE 31.12.2018: PHP756.8 million), whilst non-motor classes registered a 17.5% increase in GPW to PHP1,404.1 million (FYE 31.12.2018: PHP1,194.5 million). Motor and non-motor businesses contributed 36% (FYE 31.12.2018: 39%) and 64% (FYE 31.12.2018: 61%) respectively of the total GPW in FYE 31.12.2019.

Nevertheless despite of the GPW growth, MAAGAP has recorded a LBT of PHP15.8 million compared to a PBT of PHP191.1 million in FYE 31.12.2018. During the current financial year under review, the loss suffered by MAAGAP was attributed mainly to the lower underwriting surplus of PHP128.0 million affected by higher claim ratio of 54.7%, compared to the underwriting surplus of PHP375.9 million with claim ratio of 38.8% in FYE 31.12.2018. Both motor and non-motor businesses recorded higher claim ratio at 55.7% (FYE 31.12.2018: 44.6%) and 53.5% (FYE 31.12.2018: 33.0%) respectively in FYE 31.12.2019. The cause for the escalating claim ratio experienced in FYE 31.12.2019 was mainly due to the abundant natural disasters namely typhoons and earthquakes that hit Philippines during the year.

Notwithstanding the deteriorating claim experiences, MAAGAP has registered improvement in investment performance with higher investment income of PHP127.7 million (FYE 31.12.2018: PHP95.4 million), higher realised gains from disposal of investments of PHP30.6 million (FYE 31.12.2018: PHP14.6 million) and lower net fair value losses on investments classified at FVTPL of PHP53.7 million (FYE 31.12.2018: PHP68.2 million) during the current financial year under review.

As at 31 December 2019, MAAGAP's total assets increased by 25.9% to PHP4,962.8 million from PHP3,941.0 million as at 31 December 2018. Correspondingly the total liabilities of MAAGAP has increased by 37.3% to PHP3,731.4 million as at 31 December 2019 from PHP2,717.6 million as at 31 December 2018. Kasturi Group's total assets at 31 December 2019 were higher at RM43.4 million (31 December 2018: RM0.7 million), which included a goodwill of RM26.6 million arising from the acquisition of SIB. Total liabilities increased from RM160,000 as at 31 December 2018 to RM6.0 million mainly attributed by the recognition of lease liabilities of RM0.9 million from the adoption of new MFRS 16 on 1 January 2019 and a purchase consideration of RM5.0 million retained from the acquisition of SIB which is payable to the sellers upon them fulfilling the profit guarantees for FYE 2019 and FYE 2020 cumulatively.

For the two (2) months ended 31 December 2019, SJI Group recorded a total operating revenue of RM2.6 million with a small PBT of RM100,000 given that November and December 2019 were low periods for secondary schools with the year-end school holidays.

For HCAT, it recorded a total operating revenue of RM1.7 million and a LBT of RM1.9 million for the two (2) months ended 31 December 2019. The loss arose mainly from year-end low periods and a one-off property, plant and equipment written off of RM1.0 million from reorganisation of the college campus under a re-negotiated new tenancy with exclusion of excess floor area and lower rental rate that is cost beneficial to HCAT.

B3. PROSPECTS

In 2019, both Malaysia and the Philippines missed the governments' gross domestic product ("GDP") targets. Malaysia recorded a GDP growth of 4.3%, below the government's official target of 4.7%. The Philippines GDP growth was 5.9%, missing the government's 6.0% - 6.5% target. Barring uncertainties in external conditions like the Covid-19 outbreak, the various trade negotiations and geopolitical risks as well as domestic factors, Bank Negara Malaysia expects the Malaysian economy to continue with growth in 2020, supported by household spending, the realisation of approved private investment projects and higher public sector capital spending; while the global credit watcher Fitch Ratings has recently revised the Philippines economy outlook from the previous "stable" to "positive" for 2020, given its sound macroeconomic policy framework and progressive fiscal reforms that will continue to support economic growth.

Riding on these, the Group expects the General Insurance business in the Philippines to continue with premium growth in 2020 given the favorable economic outlook for Philippines. Barring unforeseen circumstances like natural disasters which Philippines is most vulnerable to and the market driven stock performance, the Group expects MAAGAP to improve its financial performance in 2020.

On another front, 2020 will be a challenging year for the Group's Education Services business. The Education Services' operating units namely Kasturi Group and the newly acquired SJI Group and HCAT will continue to intensify their marketing efforts to increase student enrollment, diversify program offerings and continue with cost control measures. At the same time, the Group will also focus to grow the new debt factoring business in 2020 to expand its income stream.

The global economy outlook for first quarter of 2020 has turned cautious with the Covid-19 (novel coronavirus) epidemic. The extent of disruption to Malaysia, Philippines and other global economies and the regional stock markets in the near term are too early to access at this stage. It all depends on how long the situation will last.

B10. FAIR VALUE MEASUREMENT OF INVESTMENTS

The Group classifies investments which are measured at fair value according to the following hierarchy, reflecting the significance of inputs used in making the fair value measurement:

- Level 1 The fair value is measured by reference to published quotes in an active market which are readily and regularly available from an exchange, secondary market via dealer and broker, pricing service or regulatory agency and those prices represent actual and regular occurring market transactions on an arm's length basis.
- Level 2 The fair value is measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions obtained via pricing services; where prices have not been determined in an active market.
- Level 3 The fair value is determined using a valuation technique based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. The main asset class in this category is unquoted equity securities. The unobservable inputs reflect the Group's own assumptions that market participants would use in pricing the investment. These inputs are developed based on the best information available, which might include the Group's own data.

The following tables show the Group's investments which are measured at fair value analysed by the various level within the fair value hierarchy:
