B11. PROSPECTS

Malaysia’s gross domestic product (“GDP”) grew by 8.7% in 2022 and is expected to have moderate growth between 4% to 5% in 2023 amid challenging external environment, with domestic demand continuing to drive growth, supported by the continued improvement in the labour market and the realisation of multi-year investment projects.

For the General Insurance business in the Philippines, held by MAAGAP, the Group expects MAAGAP to continue with premium growth and improved profit margins in 2023 by capturing a wider market share in the Philippines through agencies expansion, venture to innovative digital transformation and management efficiency while preserving its prudent selection of risk and underwriting principles. Baring other unforeseen circumstances like natural disasters which Philippines is most vulnerable to and the market driven stock performance, the Group is cautiously optimistic and expects MAAGAP to improve its revenue and financial performance in 2023.

2023 will remain challenging for the Group’s Education Services business. The Education Services’ operating units namely Kasturi, SJI Group and Imperium Edumaax will continue to intensify their marketing efforts to increase student enrolment, diversify program offerings and continue with cost control measures.

The Credit Services segment of the Group comprises of Money Lending and Debt Factoring business activities. The Money Lending business will implement management action plans to re-strategise its business plans and improve its debt collection activities. The Debt Factoring business will continue to pursue growth opportunities in-line with the opening of all economic sectors.

The Hospitality Services segment of the Group will continue to strengthen its efforts and position in the market which looks increasingly promising by travel restrictions being lifted and expected increase in influx of tourism activities.

Given that global economic growth is expected to slow in 2023, the Group expects the operating environment to be increasingly challenging and competitive. Notwithstanding this, the Group will continue to be cautious while continuing its efforts in implementing and executing management strategic plans in expanding the existing business and improving profitability.
